House For Rent

These six different flats and apartments are available to rent. The estate agent is advertising the cost of the rent, per month. This amount does not include any other bills such as those for water, electricity, gas, television etc.

National Curriculum 2014: Years 3 & 4

- Add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction
- Estimate and use inverse operations to check answers to a calculation

Lets start...

- How much would it cost to rent the most expensive property for a month? A quarter of a year? Half a year? A year?
- How much cheaper, per month, is the cheapest property?
- I rent the flat in school road for 0.5 of the year, and then move to the apartment in Clifford Road. How much will I have spent on rent over the first year?

Hungry for more?

The estate agent will take one tenth of each month's rent as their fee, and the remainder will be for the owner of the house. How much will the owner of each house receive?

Still hungry?

The agent says that instead of taking one tenth each month, they will take £10 the first month, £20 the next, £30 the next and so on, for the whole year. Which is better for the owners of the properties?
