Estimate Answers

1a. True or false?

The calculation below has an approximate answer of 860 if both numbers are rounded to the nearest ten.

VF

1b. True or false?

The calculation below has an approximate answer of 620 if both numbers are rounded to the nearest ten.

VF

2a. Estimate the answer to the calculation below.

VF

2b. Estimate the answer to the calculation below.

VF

3a. Tick the best estimate for $307 + 518$.

VF

A.

B.

C.

3b. Tick the best estimate for $419 + 354$.

VF

A.

B.

C.

4a. Tick the calculation which is the best estimate for $589 + 408$.

VF

A.

B.

C.

4b. Tick the calculation which is the best estimate for $372 + 526$.

VF

A.

B.

C.

Estimate Answers

5a. True or false?

The calculation below has an approximate answer of 1,840 if both numbers are rounded to the nearest ten.

$$1,456 + 372$$

VF

5b. True or false?

The calculation below has an approximate answer of 6,300 if both numbers are rounded to the nearest 100.

$$3,806 + 2,491$$

VF

6a. Estimate the answer to the calculation below.

$$3,479 - 2,304$$

VF

6b. Estimate the answer to the calculation below.

$$5,986 - 3,213$$

VF

7a. Tick the best estimate for $5,241 + 3,496$.

A. 8,000

B. 8,800 C. 8,700

VF

7b. Tick the best estimate for $3,749 + 4,282$.

A. 7,000

B. 8,000 C. 9,000

VF

8a. Tick the calculation which is the best estimate for $3,456 + 6,445$.

A. $2,500 + 6,400$

B. $3,000 + 7,000$

C. $3,500 + 6,400$

VF

8b. Tick the calculation which is the best estimate for $2,589 + 4,825$.

A. $2,600 + 4,900$

B. $2,600 + 4,800$

C. $2,500 + 4,900$

VF

Estimate Answers

9a. True or false?

The calculation below has an approximate answer of 1,500 if both numbers are rounded to the nearest hundred.

three thousand, four hundred and twenty-seven minus one thousand, nine hundred and four

VF

Estimate Answers

9b. True or false?

The calculation below has an approximate answer of 6,000 if both numbers are rounded to the nearest hundred.

three thousand, nine hundred and twenty-four add two thousand and sixty-three

VF

10a. Estimate the answer to the calculation below.

eight thousand, five hundred and seventeen – four thousand, three hundred and twenty-three

VF

10b. Estimate the answer to the calculation below.

nine thousand, four hundred and twenty-five – four thousand, eight hundred and seventy-nine

VF

11a. How have the numbers been rounded in the calculation below to estimate the answer?

$$8,725 - 2,462$$

Estimate: Six thousand, two hundred and seventy

VF

11b. How have the numbers been rounded in the calculation below to estimate the answer?

$$1,397 + 6,890$$

Estimate: Eight thousand, three hundred

VF

12a. Which calculation is the best estimate for the partitioned calculation below?

A. $3,000 + 7,000$

B. $4,000 + 8,000$

C. $3,500 + 8,000$

VF

12b. Which calculation is the best estimate for the partitioned calculation below?

A. $5,000 + 4,000$

B. $5,400 + 4,500$

C. $6,000 + 4,000$

VF
